

Brand identity

A modern identity for a more informed tomorrow.

Data.
Perspective.
Better decisions.

One mark.
A consistent identity.
Every external touchpoint.

A clearer perspective

The identity turns a complex world into a clear, recognizable signal.

Parallel lines. Shared direction.

OddsFront maps live conflict and geopolitics prediction markets. Its identity is precise, calm and direct.

01

Clarity

Lead with the signal. Use generous space, clear typography and one visual focus.

02

Perspective

Two parallel strokes form one distinctive mark. Preserve their angle, spacing and equal width.

03

Consistency

Use the supplied masters across browser icons, social profiles, previews and project resources.

The primary signature

The symbol and the wordmark form the preferred horizontal lockup.

PRIMARY / LIGHT BACKGROUND

REVERSED / DARK BACKGROUND

WORDMARK / WHEN THE SYMBOL IS ALREADY PRESENT

Built from two strokes

Normalized vector geometry derived from the supplied logo references.

72

Equal stroke widths

Both bars have the same horizontal width. Their top and bottom edges remain level.

50

Consistent separation

The horizontal gap between strokes is fixed at 50 units at every height.

25.3°

A shared forward lean

The strokes shift 106 units horizontally across a 224-unit height. Do not rotate or reshape them.

A flexible lockup system

Choose the composition for the available space, then keep its proportions fixed.

HORIZONTAL / DEFAULT SIGNATURE

STACKED / CENTERED COMPOSITIONS

OddsFront

WORDMARK / TEXT-LED PLACEMENTS

SYMBOL / SMALL OR REPEATED BRAND SURFACES

Color, reversed, monochrome

Use the supplied variant that gives the mark a clear silhouette.

PRIMARY / PERIWINKLE + DEEP NAVY

REVERSED / PERIWINKLE + WHITE

ONE COLOR / BLACK

ONE COLOR / WHITE

Four colors. One identity.

The core palette follows the supplied brand reference.

Periwinkle

#6366F1

RGB 99, 102, 241
CMYK ≈ 59, 58, 0, 5

Primary brand color

Deep Navy

#0F172A

RGB 15, 23, 42
CMYK ≈ 64, 45, 0, 84

Primary type / dark field

Charcoal

#374151

RGB 55, 65, 81
CMYK ≈ 32, 20, 0, 68

Secondary text

Light Gray

#F8FAFC

RGB 248, 250, 252
CMYK ≈ 2, 1, 0, 1

Light background

Optional icon gradient

#6366F1 → #5548FF. Keep flat color for the primary logo and monochrome masters.

Digital masters use sRGB.
CMYK values are calculated starting points.
Approve a physical proof before print.

Typography with intention

Inter keeps the identity legible, contemporary and consistent with the product.

OddsFront750

Production wordmark · outlined masters · tracking -0.035em

Clear perspective700

Headings · strong, concise hierarchy

Make complex information easier to read.400

Body copy · comfortable line height of 1.45–1.6

The raster references did not include a font file. The production wordmark is reconstructed in Inter 750 and delivered as vector outlines; no installed font is required to use the logos.

Space protects the mark

The reference defines X as the height of the symbol. Leave at least 1X around the logo.

Horizontal

144 px digital / 30 mm print

Stacked

100 px digital / 22 mm print

Symbol

16 px digital / 5 mm print

Locked favicon, app-icon and avatar canvases use their supplied internal padding. Do not add the full logo clear space inside those canvases.

Contrast before decoration

Choose a readable pairing. Decorative brand color is not automatically suitable for small text.

Aa

Deep Navy on Light Gray

17.06 : 1

Suitable for normal and large text.

Aa

White on Deep Navy

17.85 : 1

Suitable for normal and large text.

Aa

White on Periwinkle

4.47 : 1

Large text and graphics only.
Below the 4.5 : 1 normal-text threshold.

DO

Keep proportions, clear space and approved colors. Use the white mark on busy dark backgrounds.

AVOID

Stretching, changing the angle, merging the strokes, outlining the wordmark, adding shadows, or placing the mark on low-contrast backgrounds.

Icons and avatars

The symbol carries the identity at small sizes. Reserve the wordmark for wider surfaces.

Maskable PNG · 512

A first impression worth sharing

A clean preview makes the brand visible when someone shares the map.

One identity. Before the click.

The preview carries the new logo, the product purpose and the canonical domain.

figures

A stable brand asset

Avoid dated odds, market results or claims that could become stale.

A ready-to-use social family

Consistent exports for square posts, vertical stories and wide profile headers.

SQUARE / 1080 × 1080

STORY / 1080 × 1920

PROFILE HEADER / 1500 × 500

OddsFront

Avatar masters
SVG + 1024 px PNG

These are authored canvas presets. Check the current crop in the destination app before publishing, especially around avatars and profile controls.

A restrained visual language

Let the two-stroke geometry create rhythm without competing with the message.

Layout

- Generous margins.
- Clear alignment.
- One primary focal point.

Voice

- Clear, calm and specific.
- Describe what the data shows.
- Avoid promises or certainty.

Motion

- Short, subtle transitions.
- Preserve the two-stroke shape.
- Respect reduced-motion settings.

Ready for every external surface

Use the masters as the source of truth. Keep generated exports together with their version.

Inside the package

37 SVG masters with outlined wordmarks

37 high-resolution PNG logo variants

4 social and profile canvases

16 brandbook pages + editable HTML

Platform icons · design tokens · source references
SHA-256 inventory · reproducible generation scripts

01 Start with the master

Select horizontal, stacked, wordmark or symbol. Pick the matching color variant.

02 Choose the destination

Use SVG for scalable artwork, transparent PNG for raster tools, and the dedicated exports for browsers and devices.

03 Respect the product boundary

This release applies the new identity to external surfaces only. Existing website controls and DropsBot elements stay intact.
